

41889/42889 iOS Application Development
Autumn 2020

Assessment Task 3: Product Design Worksheet

team name	Student Name	Student Number
Enterprise	Tianqi Fu	13508647
	Zihao Yan	11942366
	Kang Xie	13509346

We will create an application for user
(persona type)

that helps them to track events or their thoughts easily with advance functions
(pain point)

by allowing people to record memo, use AI to recognize text and synchronize it to other apps/cloud.
(functionality)

The app will need data models for User info storage and account information
Storage of recording and text files

and custom views for Nothing

and frameworks to interface with the user interface, speech reorganization,
voice recording

Product workflow
